...   of the firms do not provide detailed descriptions of the services
they offer or the **location** of their offices.
     Several firms take great effort to make their site a reference point
...

...visitors are then able to direct questions to the appropriate
individuals.
     Disclosing the firm's **location** is also critical. For potential
clients looking for an accounting firm close at hand, not disclosing
location may lose you business. For example, one firm provides a live
"skycam" picture of Atlanta...maps and directions (for example,
www.cpas.net). Surprisingly, many firms do not disclose their **location** on
their Internet site. Given the global implications of the Internet and its
ability to facilitate business from very distant locations, some must feel

that disclosing **location**⬤ay discourage potential client⬤For example,
some accounting firms are providing tax services directly through the
Internet. **Location** , in this context, may not be important.
    Finally, access to important information can be limited...

A PROPOSAL FOR A GEOGRAPHIC-**BASED** ADDRESS **STRUCTURE FOR IPV6** (INTERNET
)
   Author: YE, XIAOMIN
   Degree: M.COMP.SC.
   Year: 1998
   Corporate Source/Institution: DALTECH-DALHOUSIE UNIVERSITY (CANADA) (
             1326)
   Source: VOLUME 37/06 of MASTERS ABSTRACTS.
             PAGE 1932. 99 PAGES
   ISBN: 0-612-39714-9

A PROPOSAL FOR A GEOGRAPHIC-**BASED** ADDRESS **STRUCTURE FOR IPV6** (INTERNET
)

     The **Internet** is currently expanding much faster than its creators
had ever imagined. It recently became apparent that the existing version of
 Internet Protocol—(IP) was inadequate to meet the performance and
functional requirements for the **Internet** . In particular, insufficient
addressing space directly restricts the growth of the **Internet** . A new
version of IP, IPv6, has emerged as a replacement of the current IPv4. In
the new version, **Internet** addressing space is expanded from 32 bits to
128 bits.
     However, IPv6 is not just about fixing the **Internet** 's addressing
problem. The purpose of designing IPv6 has become to correct as many other
things as possible in the **Internet** . One of the most important issues in
the **Internet** is the increasing burden **associated** with routing. Owing to
the growth of the **Internet** , the size of routing tables and amount of
traffic to be routed are increasing at a high rate. The routing problem has
become a bottleneck in the development of the **Internet** . With the
increased **address** length in IPv6, novel addressing schemes are being
proposed in order to solve the routing problem. In particular, to
facilitate **geographic** -based routing techniques, one-eighth of the IPv6
addresses have been reserved for **geographic** -based addressing.
     The motivation for a **geographic** -based addressing scheme arises from
the potential advantages it offers such as establishing a unique mapping
between the **network** entity and its real **location** , facilitating routing
based on simple direction information, and supporting the mobility of

network elements. Geog...ic -based addressing is straig...orward to implement by incorporating a Global Positioning System (GPS) receiver into some or all **network** devices and encoding **geographic** information into the addresses. An overview of GPS, which provides accurate latitude, longitude and altitude...

ANALYSES OF ACCEPTABLE USE POLICIES REGARDING THE   INTERNET **IN**   SELECTED
K-12 SCHOOLS IN THE UNITED STATES

     The purpose of this study was to investigate the presence, origins, contents and purposes of **Internet** Acceptable Use Policies being used to **address** issues and concerns surrounding the **Internet** in 100 **selected** K-12 schools in the United States. The implementation practices of educators utilizing AUPs and the attitudes of educators toward the **Internet** were also examined. The study also investigated the number and location of **Internet** connections in the **selected** K-12 schools. A researcher-developed online survey was used to collect descriptive data in conjunction with qualitative data collected from a content analysis of 24 **selected** AUPs to **address** the purpose of this study and to answer the eight research questions presented to guide...

...and organizational communication theory. The findings indicated that K-12 schools were utilizing AUPs to **address** the **Internet**. The data indicated that AUPs were developed by educators usually at the **district** or school level. The key issues and concerns addressed in AUPs were found to be...

...areas: liability, online behavior, system integrity, and quality of the content of materials on the **Internet** . Data suggested that the most common resource utilized to develop AUPs was the **Internet** policies of other schools or school districts. Access to the **Internet** was found to vary from school to school with regard to number and **location** of connections. Most of the AUPs examined were developed for preventive reasons. The major intent of the policy writers appeared to be an effort to provide access to the **Internet** while at the same time protecting the rights of individual users and disclaim the liability of the schools as **Internet** service providers. The general attitudes of educators toward the **Internet** were positive; tempered with legal, ethical, pedagogical, social, and economic concerns and issues.

PROTOCOLS FOR MOBILE INTERNETWORKING (NETWORKS)
  Author: IOANNIDIS, JOHN
  Degree: PH.D.
  Year: 1993
  Corporate Source/Institution: COLUMBIA UNIVERSITY (0054)
  Source: VOLUME 54/12-B OF DISSERTATION ABSTRACTS INTERNATIONAL.
          PAGE 6301. 203 PAGES

    We consider the problem of Mobile Internetworking, that is, providing
network access to hosts whose physical **location** changes with time. Such
hosts cannot depend on traditional forms of **network** connectivity and
routing, because their **location** , and hence the route to reach them,
cannot be immediately deduced from their **network** **address** .
    The three major points of the thesis, which are a departure from
previous approaches, are: (1) Mobility is a **network** -layer problem, and is
best attacked by **embedding** virtual mobile networks at the proper
hierarchical **address** level. (2) Locality in host mobility, can be taken
advantage of in order to yield efficient and practical tracking and routing
mechanisms. (3) On-demand acquisition of mobile host **location**
information, which is essentially routing information, yields a system that
scales linearly as a function...

    ...IP-based protocols for mobile internetworking. The protocols operate
mostly at the data-link and **network** layers, and seamlessly integrate
mobile hosts into the current networking infrastructure. While it may be...

    ...feature is the use of ancillary routers, called Mobile Support Routers
(MSRs), to track the **location** of the Mobile Hosts (MHs) and provide them
with **network** access. Using a combination of caching, forwarding pointers,
and timeouts, a minimal amount of state...

    ...state information is kept in a distributed fashion, the system scales
well, and the overall **network** reacts quickly to changes.

DISTRICT **LEVEL PREDICTORS TO THE COST OF REPORTING NEW JERSEY STATE
DEPARTMENT OF EDUCATION'S MANDATED REPORTS**
  Author: RITSCHL, CARLO
  Degree: ED.D.
  Year: 1993
  Corporate Source/Institution: COLUMBIA UNIVERSITY TEACHERS COLLEGE (0055
)
  Source: VOLUME 54/08-A OF DISSERTATION ABSTRACTS INTERNATIONAL.
          PAGE 2834. 153 PAGES

  DISTRICT **LEVEL PREDICTORS TO THE COST OF REPORTING NEW JERSEY STATE
DEPARTMENT OF EDUCATION'S MANDATED...**

    This study investigated the relationships between **district** level
variables and the cost of reporting state mandated documents. Two tiers of
data collection...

    ...s 1991 Information Management Study. Finally, the two data collections
were merged by their common **district** identification number for a 90%

match. Other **district** v●ables were collected using sta●reports and
grouped by **district** to compile a data file containing all cost-related,
demographic, economic, **geographic** , and technological variables.
    Results showed most of the independent variables were significantly
correlated to cost...

...students receiving free or reduced lunch and greater levels of
dissatisfaction with paperwork were closely **associated** with high costs of
reporting the ASSA. Highest correlation to the cost of reporting the...

...of disadvantages with which urban districts are burdened.
    Use of computers had little or no **association** with the cost of
reporting. This is a surprising finding. It appears that computers alone...

...to approve and fund a plan integrating DOE with districts in a
state-wide interactive **network** for managing information. This would
address the equity issue on cost of reporting and reduce the cost of
reporting state mandated...

NEURAL NETWORK MODELS OF SOUND LOCALIZATION BASED ON DIRECTIONAL FILTERING OF THE PINNA

     Psychophysical evidence suggests that localization of sound depends upon directional **filtering** of the pinna in mammals in addition to interaural disparity cues. Using a systematic map...

...different points in space (Rice et. al, 89), layered feedforward neural networks that transform pinna **filtered** stimuli to a two dimensional representation of spatial **location** (modelled according to the spatial code in superior colliculus) were constructed. A certain kind of task distribution in the intermediate layer imposed by constraining the **network** to degrade uniformly upon removal of single units in the intermediate layer (uniform fault tolerance) is developed to **address** the problem of multiple solutions and is shown to be a useful property in that it leads to

good generalization perf●nce. The resulting **network** s●tions were
characterized (a) by bandlimited inputs to study the computational
importance of different frequency regions of input stimulus spectra; and
(b) by generating response maps of **network** units to tones to study the
kinds of response properties of neurons that are useful in extracting sound
location information from spectral cues provided by the pinna. **Network**
inputs to tones are rate-profiles of auditory nerve (AN) fibers for single
tones. Rate...

...et. al, 89) and AN fiber tuning curves (from B.Delgutte). Computational
properties of various **network** solutions reveal that the frequency region
containing the first notches in the stimulus spectrum (5...

...computation and that monaural information is sufficient to extract sound
localization information. Response properties of **network** units resemble
cochlear nucleus types III and IV units (Young and Brownell, 76) and their
composites. Study of relationships between computational significance and
connectivity patterns of **network** units reveals that some units are
characterized by the presence of inhibitory connectivity from the...

   Degree: PH.D.
   Year: 1983
   Corporate Source/Institution: UNIVERSITY OF CALIFORNIA, LOS ANGELES (
            0031)
   Source: VOLUME 44/05-B OF DISSERTATION ABSTRACTS INTERNATIONAL.
            PAGE 1521. 154 PAGES

**ISSUES OF NETWORK TRANSPARENCY AND FILE REPLICATION IN THE DISTRIBUTED
FILESYSTEM COMPONENT OF LOCUS (SYSTEM)**

       ...building distributed software. This dissertation addresses these
issues in the light of new local area **network** hardware which has improved
bandwidth, delay and error characteristics. Software principles are
proposed for designing local area **network** operating systems.
          One of the major architectural approaches to ease software
development in a distributed environment is **network** transparency, by
which we mean both a global naming scheme for all resources in the **network**
 and a common interface for local and non-local resources so the collection
of machines appears to users and applications as a single machine. **Network**
 transparency also facilitates data sharing. The principle of resource
location transparency is analogous to and may be as significant as the
principles of data independence in database design and virtual memory in
operating system design.
       Automatic and yet **selective** resource replication can, when
coupled with transparency, **address** the increasing need for higher
availability. If one copy of a resource is unavailable, another...

...substitution.
       Two internal architectural principles are particularly
significant. First is the idea of hiding the **network** interface deep
within the operating system, transparent even to upper levels of the
operating system...

       ...schools were interviewed regarding their perceptions of inservice
education and degree of satisfaction with their **district** -funded teacher
center. Results of the interviews were used to answer research questions
and to...

...centers; they perceived positive and negative features of inservice
education; and there were identifiable factors **associated** with
respondents' degree of participation at the PTC.
        Conclusions.
        (1)Respondents were not pleased with...
...and subject-area concerns; programs were delivered by the school
administration and designed to meet **district** rather than teacher needs;
scheduling was irregular and there was insufficient follow-up; sessions
tended to be too theoretical, did not **address** individual needs and were
mandatory.
        (2)Respondents were familiar with the concept of a teacher...

...for centers. Mentioned were such factors as: diversity of programs;
effectiveness of communication and coordination **network** ; professional
development and renewal; access to materials; reduction of teacher
isolation; personalized atmosphere; appropriateness and...

...attractive rather than unattractive. Frequently mentioned attractive
aspects were: the director and staff, functional facilities; **location** ;
supportive, congenial atmosphere; accessibility and availability; teacher
exchange and collaboration; contact for resources; accommodation of...

...of personnel. Unattractive features mentioned were: lack of incentive
for attendance; redundant services; scheduling problems; **location** ;
orientation toward elementary-school concerns; overemphasis on lower level
and personal growth courses; inadequacies of the communication **network** ;
over-centralization; and emphasis on improvement as correction of teacher
practices.
        (4)Respondents' participation in...

...both program content and organization. Recommendations were for:
improved scheduling procedures; modification of the communication **network**
; increased collaboration with colleges and universities; more subject
matter courses; additional courses on methods and...

Trend Micro moves towards **Internet** services model
  ASIA: NEW **INTERNET** SERVICES PLAN BY TREND MICRO

A new **Internet** services plan has been adopted in the Asia-Pacific region
by Taiwanese antivirus firm Trend Micro. The **Internet** services plan
comprises of the eDoctor service model and content **filtering** services.
The **Internet** eDoctor service model enables real-time virus regulation and
leverage users remotely by systems integrators. The model includes a
monthly antivirus status report for enterprise users which offers **network**
 security status and virus **location** status. The **Internet** content
 filtering services will include the following: - virus detection and
protection - anti-spam services - **URL** **filtering**

  Title: **Analyses of acceptable use policies regarding the** Internet **in** selected **K-12 schools**
  Abstract: This study examined the presence, origins, contents, and purposes of **Internet** acceptable use policies (AUPs) in 100 **selected** K-12 schools in the United States. An online survey and a content analysis of 24 **selected** AUPs were used to provide data. Descriptive and qualitative analysis of the data indicated that K-12 schools are using AUPs to **address** the issues and concerns surrounding the **Internet** ; most policies are developed at the **district** or school level: areas of liability, online behavior, system integrity, and content quality are key issues contained in AUPs; and violation of policies usually resulted in loss of **Internet** access.

  Title: **A** network **measurement architecture for adaptive applications**
  Abstract: The quality of **network** connectivity between a pair of **Internet** hosts can vary greatly. Adaptive applications can cope with these differences in connectivity by choosing...

  ... from alternate locations. In order to effectively adapt, applications must discover the condition of the **network** before communicating with

distant hosts. Unfortun●ly, the ability to predict or ●rt the quality
of connectivity is missing in today's suite of **Internet** services. To
address this limitation, we have developed SPAND (shared passive **network**
performance discovery), a system that facilitates the development of
adaptive **network** applications. In each domain, applications make passive
application specific measurements of the **network** and store them in a
local centralized repository of **network** performance information. Other
applications may retrieve this information from the repository and use the
shared...

... architecture has been used with specifics types of data transport.
Finally, we describe LookingGlass, a **WWW** mirror site **selection** tool
that uses SPAND. LookingGlass meets the conflicting goals of collecting
passive **network** performance measurements and maintaining good client
response times. In addition, LookingGlass's server **selection** algorithms
based on application level measurements perform much better than techniques
that rely on **geographic location** or route metrics.

   Abstract: Proposes a World Wide **Web** information retrieval system called
KiSS (Kansei Information Search System) which can handle Kansei words such
as "joyful" or "hot". Users can retrieve **WWW** information simply by
 selecting suitable **location** on prepared charts without inputting
keywords in KiSS. KiSS has a **URL** (Uniform Resource Locator) database to
retrieve information by Kansei words. Each **URL** in the database has a
record consisting of a title, a comment and Kansei attributes. A **Web** page
register marks points for each Kansei attribute. KiSS makes use of these
points to retrieve information. There is a difference in the Kansei between
the **Web** page register and the user. In order to solve this problem, we
introduce a relative...

... on statistical data collected by questionnaires. In each group, we
obtain Kansei words with an **associated** degree (e.g. joyfulness 0.8) for
particular **Web** pages. The evaluations of some people are not always
equal; therefore, we apply fuzzy sets...

.... Kansei model. Finally, we present a qualitative analysis of the
constructed relative Kansei model. The **WWW** information retrieval system,
which is now available, employs some of the ideas of KiSS.
   Identifiers: World Wide **Web** information retrieval system...
...**URL** database...

   Title: **Distributed fault** location **in networks using mobile agents**
   Abstract: the use of distributed problem solving using mobile agents
for fault finding in order to **address** the issues of client/server
approaches to **network** management and control, such as scalability and the
difficulties **associated** with maintaining an accurate view of the **network**
   The paper uses a recently described architectural description for an
agent that is biologically inspired...

... used in distributed problem solving arising from the self-organization
of swarms of agents. Fault **location** is achieved as a consequence of
agents moving through the **network** , sensing, acting upon sensed
information, and subsequently modifying the chemical environment that they
inhabit. Elements...

... being used to support this research, and the mechanisms used for agent
mobility within the **network** environment, are described.

Title: Internet childhood safety and health resource guide
...Abstract: Program has historically published a paper based directory of printed material, audiovisual material, and organizations associated with childhood safety and health issues. The directory, titled Childhood Safety and Health Resource Guide was recently made available online via the World Wide Web (WWW). The advantages of WWW publication and distribution include: information is made available to a great many potential users; updates...

... disadvantages: there will always be some portion of traditional extension clientele who do not have Internet access or prefer paper based formats; paper based information can be more easily carried; and clientele must know the WWW location in order to obtain the information. To date, the WWW Resource Guide has received limited use. However, as more county Cooperative Extension Service offices in Indiana gain Internet access and Extension educators become accustomed to using online resources, a significant increase in utilization is expected. Future efforts will place greater emphasis on making the WWW Resource Guide URL known to

potential users by pu⬤cizing the **URL** in Indiana new⬤edia, national agricultural media, and by making the **URL** accessible through the numerous **Internet** indexes and search engines.

 Title: **Moving happily through the World Wide** Web
  Author(s): Gershon, N.
  Journal: IEEE Computer Graphics and Applications   vol.16, no.2   p.

Title: **Moving happily through the World Wide** Web
...Abstract: of interacting with information distributed over the global
information infrastructure, specifically for the World Wide **Web** . The
introduction of NCSA Mosaic changed the way we get information over the
Web . With the click of a button, Mosaic's graphical user interface made
it possible to browse and retrieve literally any information accessible
through the **Web** . This is true if you know the document's Universal
Resource Locator (**URL**), an identifier expressing its **location** . You type
in this **address** and sooner or later (depending on document size and
traffic at the time), the document appears on your screen. If you do not
know the **URL** , or even which documents contain the requested information,
you might want to browse or search the **Web** . Interacting with information
on the **Web** starts with browsing and searching; continues with **selecting**
, digesting and assimilating information; terminates with generating new
information; and begins anew. The user's needs and desires must occupy
center stage during development of **Web** systems and sites. The approach
chosen should let users interact easily and effectively with the...

... throughout large arrays of documents. Visualization, computer graphics,
and just plain common sense in designing **Web** pages and presenting
information make the process better for users. This article discusses how
to construct effective presentations **Web** pages).

      ...Abstract: spanning tree (CMST) problem. The CMST is a NP-complete problem. The existing heuristic algorithms **select** one arc or **location** to be in the tree at a time and the main difference between each other is the **selection** order. Given a particular CMST problem instance we will **address** the issue of **selecting** which heuristic algorithm to apply to the problem. A modular system of neural networks is the knowledge base that is used to make the **selection** . Multiple layer neural networks are developed which are trained with the backpropagation learning algorithm. The neural **network** system is trained based on some problems and is applied to the new problems that...

   Title: Address **block**   location **on envelopes using Gabor** filters:
supervised method
   Abstract: The authors have implemented a texture-based supervised
segmentation method to identify potential destination **address** blocks in
envelope images. Texture features are computed by using a set of even
symmetric Gabor **filters** . A one-layer neural **network** classifier is used
to classify pixels into text and non-text categories using four texture
features. The authors also present a simple heuristic to **select** the
correct   destination   **address**   block from among several candidates
identified. The method works well on several envelope images.

 Title: **Circuit provisioning for a packet switched** network
 Abstract: The author describes the circuit provisioning process for the Datapac **network** , with emphasis on the current efforts to automate the system. He describes the system which is being developed: a PC/LAN (personal computer/local area **network**) configuration with gateways to

other remote systems. Th●first phase, a LAN with 20 wor●tions...

... assignment systems have been developed and implemented: the hardware assignment and tracking system (HATS), which **selects** the hardware configuration that satisfies the customer's requirements and optimizes the allocation of resources on the packet-switch concentrator, and the Datapac **address** and numbering assistance (DANA), a system that takes the customer's **l cation** and derives the appropriate Datapac serving switch, the circuit number, the control offices, and other **associated** administrative information.
Identifiers: packet switched **network** ; ...

...Datapac **network** ; ...

...personal computer/local area **network** ; ...

...Datapac **address** and numbering assistance

Language: English

Abstract: A distributed planning system is a **network** whose nodes represent distinct processors, each cooperating with a **selected** set of others to achieve a common set of goals. The authors **address** two important issues in this paper: (i) how individual processors should be interconnected so that...

... planning systems. They show the results obtained with one type of possible organization architecture, the **location** centered cooperative mode of operation. They describe and demonstrate algorithmically a simulation-based planning process...
Identifiers: **location** centered cooperative mode

 Title: **The equalizer remote-control system**
  Author(s): Anderson, R.E.; Crue, C.R.
  Journal: Bell System Technical Journal   vol.48, no.4   p.953-81
  Publication Date: April 1969 Country of Publication: USA
  CODEN: BSTJAN ISSN: 0005-8580
  Language: English

...Abstract: in discrete steps by means of commands sent out by the
control center. Memory circuits **associated** with the equalizer networks
maintain the **network** gain settings between adjustments. At each distant
main station in a control system, a loop-back unit provides decoding and
switching that control equalizers at the **location** and complete far-end
looping paths to the lines to be equalized or checked. The looping paths
pass the commands used to **address** the equalizing repeaters, which are
located between the main station repeaters. The control system also
comprises part of a fault-**location** scheme, which includes a monitoring
oscillator at each repeater.

A new regional hypocenter location **method**
Xie, Zhi; Spencer, Terry W; Rabinowitz, Philip D

A new regional hypocenter location method

ABSTRACT: A new regional hypocenter location method is presented in this
article to address location problems associated with sparse station
distributions and lack of velocity information. For an arbitrary slowness
structure, an...

...method yields reasonable solutions for epicenters and origin times both
inside and outside the seismic network . The synthetic data tests
indicate that outside the network the new method gives excellent results
for epicenter locations compared with Geiger's method, even...

...aftershocks occurring within the first 24 h after the mainshock by using
the new hypocenter location method places the aftershocks an average of
2.29 km to the southwest of the...

WHAT'S IN A WEB NAME? SOMETIMES, MISTAKEN IDENTITY

ABSTRACT:
     Jeff Woods, owner of **Internet** service provider to Raleigh and Durham,
NC, has discovered that using an **address** , or domain name, that people
associate with well-known company may not be worth free publicly that
comes with mistaken identity; he owns delta.com, a domain name he chose in
1993 for his company Deltacomm **Internet** Services; nearly everyone who
comes to his **Web** site (www .delta.com) is really looking for site of
Delta Air Lines; Woods has tried to sell **address** to Delta Air Lines; but
airlinee, which does business on the **Web** as www .delta-air.com, has
repeatedly rejected his asking price as too high (S)

GIANTS STADIUM LOOKS LIKE A WINNER CHINA BASIN BALLPARK EXPECTED TO GET OK FROM VOTERS IN S.F.
San Jose Mercury News (SJ) - Tuesday, March 19, 1996
By: MICHAEL DORGAN, Mercury News Staff Writer
Edition: Morning Final Section: Front Page: 1A
Word Count: 1,557

... the Bay Bridge in the China Basin neighborhood has been endorsed by virtually the entire **city** power structure, and polls indicate voters will approve the ballpark by a large margin.

If...

... many supporters of a new San Francisco ballpark express fears the team will leave the **city** if denied the China Basin stadium, the Giants have

not announced any contingency plans.

''We...

...that it will require no new taxes and will not impose any burden on the city 's general fund.

Skeptical but supportive

One recent poll found that a majority of voters...

... open in 2000, would generate $125 million in direct and indirect economic benefits for the city in its first year of operation.

That represents a nearly 50 percent increase over the economic benefits to the city if the team were to play that year at the aging Candlestick Park, according to the study.

The difference lies mostly in attendance. The Giants' study, done by Economics Research **Associates** of San Francisco, says the new stadium would create a greater-than-50-percent boost...

... projected economic benefits ignore tens of millions of dollars worth of hidden costs to the city for such things as additional public transportation, security and cleanup of toxic waste at the...

... and parking problems will be minimal are not supported by a study done by the city 's Transportation Authority. '' . . . It can be expected that there will be congestion in the area around the ballpark, and on city arterials leading to and from I-280 and I-80, probably for an hour before ...

.... ballpark would provide between $471,000 and $766,000 in new, direct revenues to the city if the Giants' attendance estimates prove accurate. But as to the larger question - the ballpark...

.... is unable to make a definitive calculation of the total costs and benefits to the city and county,'' he wrote.

While estimates of the economic impact of the proposed stadium may... Supervisor Roberta Achtenberg and activist minister Cecil Williams - represent a broad cross section of the city 's disparate interest groups. To manage their campaign, the Giants hired Jack Davis, who last...

...a 10-month campaign and this is a three-month campaign.''

With Brown and eight city supervisors leading the charge, the Yes on B campaign has been endorsed by four former...
... also is backed by dozens of labor, business and neighborhood groups and both of the city 's daily newspapers.

Arrayed against the Giants' campaign, which Davis said will cost $750,000...

...have to do is win a couple of games.''

MUSEUM SEEKS DONATIONS FOR ADDITION LOS ALTOS
San Jose Mercury News (SJ) - Wednesday, September 13, 1995
Edition: Peninsula/Am Section: Peninsula Extra Page: 8
Word Count: 2,108

MEMO:
 City Scenes

The new museum addition will be built next to History House behind **City**
 Hall. Frankenfield said the **Association** of the Los Altos Historical
Museum needs $1 million to complete the center. A full...

...a model of the proposed building are available in about a month.

MOUNTAIN VIEW
     YOUR **CITY** CALLS: Ask not what your **city** can do for you, but what
you can do for your **city** .

    At least, that's the Mountain View version of John F. Kennedy's historic
directive. The **city** is currently looking for residents to get involved in
their local government.

    Applications are being...

... Board, Environmental Planning Commission, Visual Arts Committee and the
Revitalization Committee Downtown Interest.

    Call the **City** Clerk 903-6304 for applications.

PALO ALTO
    MOVING RIGHT ALONG: Efforts to start a Family...

...ALTO
    RIGHTED RULES: It's been a confusing 12 years trying to wade through the
city 's ordinances.

    So much so that the East Palo Alto **City** Council approved $9,500 at
their last meeting to get a publisher to codify their...

...local ordinances were always categorized by number, not by topic, making
it difficult for the **city** 's officials to know where to look for legal
precedents, **city** staff said.
    It was nearly impossible to tell when a **city** ordinance clashed with a
county ordinance, or even when an East Palo Alto ordinance conflicted with
itself, explained Michael Lawson, the **city** 's attorney.

    By codifying the ordinances, it will make it perfectly clear to the
public, the legal system, and the **city** 's officials exactly what East Palo
Alto's laws are, he said.

    After considering bids from three publishers, the **city** settled on Book
Publishing Co., of Seattle, which has promised to finish the project within
nine months.

    The **City** Council will also be considering purchasing a $2,600 software
program that will allow them...

...page on the ever-expanding World Wide Web. The home page offers her 14th
Congressional **District** constituents information about the **district** and
Eshoo's legislative activities. It also means voters can interact with her
electronically.

    ''Thanks...
...new home page will help me keep in closer contact with the people of the

(**district**),'' Eshoo sa██. ''My constituents expect and   erve high-tech access to their representative in Washington...1:30 p.m. Sunday at the Civic Center grounds, between the library and the **City** Council chambers at the corner of Laurel Street and Ravenswood Avenue.

WOODSIDE
ART APART: The...

**COUNCIL TO REVIEW SUGGESTIONS ON BIKE LANES, SMOKING, ETHICS SUNNYVALE TO
  MAP OUT FUTURE OF** CITY
San Jose Mercury News (SJ) - Wednesday, November 23, 1994
By: LELAND JOACHIM, Mercury News Staff Writer
Edition: Morning Final Section: Extra 2 Page: 1
Word Count: 1,074

**COUNCIL TO REVIEW SUGGESTIONS ON BIKE LANES, SMOKING, ETHICS SUNNYVALE TO
  MAP OUT FUTURE OF** CITY

TEXT:
Smoking. Bike lanes. Ethics. A shorter mayoral term.

   The Sunnyvale **city** Council is trying to decide which issues to address,
and when, in the coming year. A cross-section of **city** problems, politics
and aspirations is contained in a stack of "issues papers" that council
members...

...a few new matters to the stack. Only a handful of residents spoke.

Sunnyvale Employees **Association** President Loren Wiser suggested marketing the services of various **city** departments to other entities in order to produce revenue for Sunnyvale. As an example, he...

... a limit on the number of cars per home, to slow the decline of neighborhoods. **City** Manager Tom Lewcock said the **city** doesn't have the power to tell people how many cars they can own and park on public streets. **City** Attorney Valerie Armento said the council could look at requiring larger garages for larger homes...

...discussed:

(box) A study of a possible one-year mayoral term and review of the **selection** process for mayor and vice mayor. A two-year term for the mayor, who is...

... question, the study will include the manner in which the mayor and vice mayor are **selected** . The council now **selects** them by majority vote, but many believe the **selection** is really made before the public meeting.
Last year, the mayor was **selected** after councilmen-elect Noll and Jim Roberts talked separately with mayoral aspirants. Noll and Roberts...

...former colleagues.

(box) Contracting out for operation of the sewer plant. By seeking bids, the **city** could determine whether continuing to operate the plant is more cost-effective than hiring it...

.... time, the commission was considering a recommendation to the council about whether or not the **city** should build the trail. A resident appeared at a council meeting and said she felt...

...endorsed it.

SUNNYVALE ADDS E-MAIL AND PONDERS NEXT STEP
San Jose Mercury News (SJ) - Wednesday, April 27, 1994
By: LELAND JOACHIM, Mercury News Staff Writer
Edition: Morning Final Section: Extra 2 Page: 1
Word Count: 997

TEXT:
Sunnyvale residents adept at computers can now berate their least loved **city** council member as quickly as they can type on their keyboards at home or at...

The **city** last week joined the Internet, the sprawling global network of computer networks, and, at least at first, it will be used for electronic mail between the **city** and residents.

Not that the **city** won't provide some direct services. People will be able to reserve parks and recreation facilities and register for leisure classes. But **city** documents and reports won't be available through the Internet.

Sunnyvale joined Bay Area agencies including Oakland, San Francisco, San Mateo County, Cupertino, Palo Alto, Berkeley and the **Association** of Bay Area Governments in providing the capability for e-mail exchanges with residents through the Internet.

The **city** proceeded deliberately, obtaining one Internet "domain name," which when preceded by the abbreviated name of...

...constitutes an "address."

This initial approach will yield knowledge about how Internet can help the **city** provide good service, whether the cost is worth it, and what the next step might be, said Shawn Hernandez, **city** director of information technology.

The **city** is paying $400 a year to Silicon Valley Public Access Link for access to Internet. The fee includes the **city** 's telephone charges.

Under discussion is possibly linking **City** Hall and other **city** buildings on West Olive Avenue, using fiber-optic cable, and connecting far-flung offices to...

... by telephone lines. Staffers could then talk with residents and each other electronically.

If the **city** decides to do that, the cables could be in place in six to eight months....

... but probably will be minimal because conduits which carry other cables and wires among the **city** buildings already are in place.

The **city** has internal e-mail on the mainframe it uses for all data processing, but it tends to overload the system, Hernandez said.
When the **city** has its own electronic communications system, residents can contact departments directly. And the **city** could store documents in files and provide a sophisticated guide to help residents find them...

...for a party of 8 on May 28 if one is still available. Aloha!"

The **city** council in January decided to set up e-mail on Internet.

Richard Treanor, personal computer coordinator for the **city** , will check Internet messages twice a day and have them carried to appropriate departments for...

...the message or give responses to Treanor to send via Internet.

Even now, someone in **City** Hall with a personal computer and modem could receive Internet e-Mail and respond to...

... Treanor's desk in the Information Technology Division, residents are asked to use the full **Internet** **address** including the "account names" of specific departments, such as, COUNCIL@

I.SUNNYVALE.CA.US.
Although...

...potentially bigger g● by going on the fast-growing   ernet.

Although many features of the **city** 's eventual on-line system aren't decided, Treanor said, he soon may soon put general information about **city** services and activities on a bulletin board, to be open 24 hours a day, seven...

... state's anti-secrecy laws, even people without computers can read the messages received at **City** Hall. Printouts of messages to the council are kept in the **city** clerk's office, and all messages are saved in the Information Technology Department.

Actually, this...

...Sunnyvale's first essay onto the net. Hernandez said about a dozen staff members including **City** Manager Tom Lewcock had e-mail addresses before the new connection was made.

IF YOU'RE INTERESTED
Internet "Account names" to prefix to the **city** 's "domain name" of @

I.SUNNYVALE.CA.US are:

(box) CLASSREG: recreation registrations

(box) COUNCIL: **city** council

**Computer City Selects Netopia as the Exclusive Provider of Internet
  Connectivity Products for Business Solutions Centers**

...   Intranet collaboration software and of plug-and-play Internet
connectivity solutions, today announced that Computer **City** , one of the
largest computer superstore retailers in North America, has selected
Netopia as the exclusive provider of Internet connectivity products for its
Business Solution customers. Computer **City** will also feature Netopia's
Internet connectivity solutions in its Internet Cafes. Under the terms of
the contract, Computer **City** will provide its customers with a single,
easy solution for high-speed Internet access through...
... all Internet connectivity setup and installation details. This bundled
solution will be available at Computer **City** 's Business Solution Centers
and Internet Cafes.
    "As the leading provider of total solutions for small businesses and
home office customers, Computer **City** selected Netopia's Internet
connectivity solutions because of their unparalleled ease-of-use and
reliability," said Nathan Morton, co-chairman and CEO of Computer **City** .
"Netopia Internet routers and Up & Running, Guaranteed! service will enable
our business customers to increase their competitive advantage through
enhanced productivity."
    Computer **City** offers total computing and communications solutions,
consultation, and support to individuals with various small-business...

... establishing home offices and networking, as well as to government,
education and corporate customers.
    "Computer **City** 's Business Solution Centers are a perfect retail

outlet for providing N●ia's high-speed...

... said Alan Lefkof, president and CEO of Netopia, Inc. "With over 100 stores nationwide, Computer **City** is a valuable partner with which to grow our business."
    Netopia's Internet Connectivity Solutions...
... of a private IP network with the economy of a single static or dynamically assigned **Internet address** . Built in IP **filters** provide a basic firewall to keep intruders out of the local network. The routers all ...

... the router. As part of Up & Running, Guaranteed!, Netopia will arrange ISP service for Computer **City** 's Business Solutions customers with EarthLink Network, Inc. (Nasdaq: ELNK), PSINet Inc. (Nasdaq: PSIX), Netcom (Nasdaq: ICGX) and US Internet.
    Computer **City** 's Business Solutions Centers
    Computer **City** 's Business Solutions Centers cater to the needs of SOHO customers by providing computer solutions...

   (USE FORMAT 7 OR 9 FOR FULLTEXT)
(Compaq is being sued by a photographer who claims Compaq's AltaVista AV
Photo Finder service infringes on the copyrights and trademarks he holds)

ABSTRACT:
...The man said he informed Compaq to stop alleged copyright and trademark
infringement through its **AltaVista** "AV Photo Finder" service. His
attorney, James G O'Neill, said his photography and his...

...O'Neill. Compaq added AV Photo Finder earlier this month in its upgrade
of its **AltaVista** portal site. The AV Photo Finder uses his images as
individual files, separate from their...

TEXT:
...Computer Corp. (NYSE:CPQ) brought itself out of a legal debacle over its
newly acquired **AltaVista** Internet portal service, the computer maker
finds itself possibly facing a court battle once again...

...photographer said he sent notice to Compaq over alleged copyright and
trademark infringement involving the **AltaVista** "AV Photo Finder" service.

Kelly, through attorney James G. O'Neill, said his copyrighted photography
...

...AV Photo Finder earlier this month, as a part of an upgrade of the
entire **AltaVista** portal site (Newsbytes, Oct. 13; 1998). At the time, a
Compaq official said AV Photo...

...various businesses. Both of his Web sites are listed on the major search
engines, including **AltaVista** , and both sites are clearly marked with
copyright and trademark notices, Kelly said.

But on...
...their context within his Web sites, Newsbytes has confirmed.

Kelly quoted original research as saying **AltaVista** inked a pact with
photography supplier Corbis to merge their databases into the AV Photo
Finder. After he reviewed the **AltaVista** , Corbis and Virage Web sites, he
concluded one or more of these companies sought out...

...posted in personal and company Internet Web sites and placed them on the
Compaq's **AltaVista** AV Photo Finder Web site for the apparent benefit of
their prospective clients.

"They're...

...has been difficult and the Internet even more difficult. In one single
act, Compaq's **AltaVista** AV Photo Finder has now made the Internet an
exponentially even more difficult medium to...

...what purpose would a company assemble more than ten million images in a
single Internet **location** if not to attract users in a medium already
known for copyright abuse." Kelly asked...

...vague," and said "there are no further statements regarding copyright or
trademark rights on the **AltaVista** AV Photo Finder pages as users search
for images readily made available to them by...

...Kelly sent to Compaq and Virage were not made public.

Compaq faced a suit involving **AltaVista** that was inherited from the
former Digital Equipment Corp., which Compaq acquired earlier this year
(Newsbytes, Aug. 11, 1998). In that lawsuit, the former **AltaVista**
Technologies Inc. (ATI) sued Compaq/DEC over the **AltaVista** name and
associated Web address .

After a two-year battle, ATI transferred the **AltaVista** name and domain to
Compaq. Press reports said ATI received $3.35 million in the...

...confirmed on Tuesday that it will provide a link starting in mid-August
between the **AltaVista** search site and the Web-based photo company.

DataSite Offers Environmental Site Assessment Aid
(DataSite offering Internet-based government information service for US
environmental professionals)

TEXT:
DataSite of Austin, Texas, has recently established an interactive research
and report-generating site on the Internet that provides government
information to environmental professionals nationwide for environmental
site assessment (ESA) research. DataSite Online WEB is fully interactive.
The site returns customized reports to the client's computer in an
executable text file format in two to five minutes from the time a request
is submitted. Color SITE Maps are also generated by DataSite for
downloading and printing in one day.

Clients access DataSite's World Wide Web address and then go to a selection
screen that allows them to perform data searchers in any state. Once the
state is selected, ZIP code, latitude/longitude coordinates, county, and
city information are keyed in to generate reports from preset database
packages or from a variety of individually selected databases. Clients pay
a minimal, annual registration fee and are billed on a per-report basis
every two weeks. There are no online access time charges or minimums
required.

"While providing instant access to environmental information at a low cost
is a major part of our marketing strategy, we believe the accuracy of our
information is our long-term advantage," said Marks Gilham, president of
DataSite. "We go to great lengths to upgrade the geographic information
contained in the government database we maintain. As a result, our reports
are substantially more accurate than those obtained from the government or
other national information companies."

DataSite also maintains a bulletin board system, DataSite Online BBS, for
clients who are not yet connected to the Internet. DataSite Online BBS was
launched in 1993 as the first interactive environmental information online
service in the country.

DataSite manages and regularly updates national EPA databases, including
RCRA, RCRA Violators, CERCLA, NPL Superfund, EPA Civil Enforcement Docket
(DOCKET), Emergency Response Notification System (ERNS), Facility Index
System (FINDS) and Toxic Release Inventory (TRI). Additionally, DataSite
manages the requisite state-level databases for more than 45 states,
including petroleum storage tank facilities (UST), leaking tank sites
(LUST), landfill (MWR) and hazardous waste site (HWS) information.
DataSite's database management procedures meet or exceed the ASTM standards
established for the environmental industry.

For more information, contact DataSite, Austin, TX, 512/250-2100;
http://www.datasite.com.

    The Internet is currently expanding much faster than its creators had ever imagined. It recently became apparent that the existing version of Internet Protocol (IP) was inadequate to meet the performance and functional requirements for the Internet. In particular, insufficient addressing space directly restricts the growth of the Internet. A new version of IP, IPv6, has emerged as a replacement of the current IPv4. In the new version, Internet addressing space is expanded from 32 bits to 128 bits.

    However, IPv6 is not just about fixing the Internet's addressing problem. The purpose of designing IPv6 has become to correct as many other things as possible in the Internet. One of the most important issues in the Internet is the increasing burden associated with routing. Owing to the growth of the Internet, the size of routing tables and amount of traffic to be routed are increasing at a high rate. The routing problem has become a bottleneck in the development of the Internet. With the increased address length in IPv6, novel addressing schemes are being proposed in order to solve the routing problem. In particular, to facilitate geographic-based routing techniques, one-eighth of the IPv6 addresses have been reserved for geographic-based addressing.

    The motivation for a geographic-based addressing scheme arises from the potential advantages it offers such as establishing a unique mapping between the network entity and its real location, facilitating routing based on simple direction information, and supporting the mobility of network elements. Geographic-based addressing is straightforward to implement by incorporating a Global Positioning System (GPS) receiver into some or all network devices and encoding geographic information into the addresses. An overview of GPS, which provides accurate latitude, longitude and altitude position information, is included in this thesis.
